

RAG Demo Knowledge Base

A synthetic company handbook designed for testing Retrieval-Augmented Generation (RAG) pipelines. The document contains structured facts, policies, FAQs, and product information that can be chunked, embedded, retrieved, and used to answer questions.

1. Company Overview

Company: NovaByte Technologies
Founded: 2021
Headquarters: Bengaluru, India
Industry: Cloud software and developer tools
Employees: 185
Website: www.novabyte.example

NovaByte Technologies develops cloud-based tools for software teams. Its main product is NovaDesk, a collaboration platform that combines project tracking, documentation, and automated engineering workflows.

2. Products

Product	Purpose	Price
NovaDesk	Project management and team collaboration	\$12/user/month
NovaCloud	Managed application hosting	Starting at \$29/month
NovaMonitor	Application and infrastructure monitoring	\$8/host/month
NovaAssist	AI assistant for internal engineering workflows	\$20/user/month

3. Employee Policies

Remote Work

Employees may work remotely up to three days per week. Teams may require specific office days for customer meetings, planning sessions, or operational needs.

Working Hours

Core collaboration hours are 10:00 AM to 4:00 PM IST. Employees may arrange the remaining hours flexibly with their manager.

Leave

Full-time employees receive 24 paid leave days per calendar year. Unused leave may be carried forward up to a maximum of 12 days.

Probation

New full-time employees have a six-month probation period. Managers review performance at months three and six.

Equipment

Engineering employees receive a company laptop, security key, and monitor on request. Equipment must be returned when employment ends.

4. Engineering Standards

Programming Languages

The backend primarily uses Python and FastAPI. Frontend applications primarily use TypeScript and React. PostgreSQL is the default relational database.

Version Control

All production code must be stored in Git repositories. Pull requests require at least one reviewer before merging into the main branch.

Testing

New backend features should include unit or integration tests. Critical production paths require automated tests in CI.

Deployment

Production deployments are performed through the CI/CD pipeline. Direct manual changes to production servers are prohibited except during approved emergency procedures.

Secrets

API keys, passwords, database credentials, and private tokens must never be committed to Git repositories. Secrets should be stored in the approved secret-management system.

5. Support and Service Levels

Priority	Description	Initial Response
P1	Complete production outage or major security incident	30 minutes
P2	Major feature unavailable with significant business impact	2 hours
P3	Standard bug or degraded functionality	1 business day
P4	General question or feature request	3 business days

6. Frequently Asked Questions

What is NovaDesk?

NovaDesk is NovaByte's project management and team collaboration platform.

How much does NovaDesk cost?

NovaDesk costs \$12 per user per month.

Where is NovaByte headquartered?

NovaByte Technologies is headquartered in Bengaluru, India.

How many remote-work days are allowed?

Employees may work remotely up to three days per week, subject to team requirements.

What database does the engineering team primarily use?

PostgreSQL is the default relational database.

Who can approve production deployments?

Production deployments follow the CI/CD pipeline and require the approvals configured for the relevant repository.

What is the P1 support response target?

The initial response target for a P1 incident is 30 minutes.

How many paid leave days do full-time employees receive?

Full-time employees receive 24 paid leave days per calendar year.

7. Key People

Name	Role	Department
Ananya Rao	Chief Executive Officer	Executive
Rohan Mehta	VP of Engineering	Engineering
Priya Nair	Head of Product	Product
Arjun Shah	Engineering Manager	Engineering
Meera Iyer	Customer Support Manager	Support

8. RAG Test Questions

Use these questions to validate retrieval and generation. They intentionally cover different sections of the document so you can test semantic search, metadata filtering, chunk overlap, and multi-document retrieval.

1. What is NovaByte's headquarters?
2. How much does NovaDesk cost per user?
3. How many days can an employee work remotely each week?
4. What is the P1 initial response target?
5. Which database is primarily used by the backend team?
6. Who is the VP of Engineering?
7. How many paid leave days do full-time employees receive?
8. What are the rules for storing API keys?
9. What programming languages are primarily used by NovaByte?
10. What is the price of NovaAssist?

Note: All company names, people, policies, prices, and operational details in this document are synthetic and created specifically for RAG experimentation. They should not be treated as real-world company information.
